## OBJECTIVE

Aspiring Full Stack Web Developer with hands-on experience in building modern web applications. Eager to leverage knowledge of front-end and back-end technologies to contribute to a dynamic development team. Seeking a Full Stack Web Developer internship to further develop skills and grow professionally in a real-world setting.

---

## TECHNICAL SKILLS

### Front-End:

- HTML
- CSS
- JS
- React
- Tailwind
- NextJS

### Back-End:

- Node.js
- Express.js
- RESTful APIs

### Databases:

- MongoDB
- MySQL

### Version Control:

- Git
- GitHub

### Tools:

- npm
  - Vim
  - Webpack
  - Postman
- 

## PROJECTS

### 1. RentHUB [React, PostgreSQL]

This project is a web-based rental application built using **React**, **TypeScript**, and **Vite**. It leverages various modern libraries and frameworks such as **Redux** for state management, **React Query** for data fetching, and **Tailwind CSS** for styling. The application includes features like user authentication via **Google OAuth**, interactive maps using **Leaflet**, and image cropping. It also supports responsive and dynamic UI components through **Shadcn UI** and **Framer Motion**.

### 2. WatchIT [React, Tanstack Query]

WatchIt project is a video streaming web application built using React and TypeScript. It provides users with a platform to browse, search, and watch movies and TV shows, featuring smooth navigation with **React Router**, API integration using **Axios & Tanstack Query**, and stylish, responsive UI components using **Tailwind CSS**. The project also includes interactive elements like carousels via **Swiper** and animations with **Framer Motion**.

### 3. Food Delivery App [React, MongoDB]

The Food Delivery App is a web application built using **React**, **CSS**, and **Mongoose**. It allows users to browse and order food from various restaurants, providing a seamless user experience with real-time updates and responsive design. The project includes features such as user authentication, order tracking, and interactive menu browsing.
